Subject: ACE permit for BNSF intermodal facility in Johnson County KS

No doubt you are receiving many e-mails on this subject.

Rather than stating the same information I wanted to let you know that my husband and I agree that a complete and reasoned approach should be taken to the approval of this project. If a full environmental impact study has not been done, then one needs to be.

We live on 56 Highway in eastern Douglas County and expect that our traffic patterns will be disrupted as well as our daily commute to Overland Park and Kansas City. Air quality and noise abatement in the towns and countryside surrounding the project are of great concern to us.

Please do all you can to assure that people in the area will not be adversely affected.

Thank you.

Anne and Richard Rowe
